Instructions for users

Searching | Adding | Editing

1. Searching

The most **simple type of search** appears on the first/home page. You can search for a construction by its Russian keywords or by the part of speech that appear as free elements in this construction.

In addition to that, you can search by the **CEFR level** of construction, picking one or numerous levels.

On the results page, constructions appear as a list. Each construction has the following information: *definition, three examples of usage, syntax and semantics tags*.

2. Adding

In order to add a new construction one must register.

Firstly, you have to click on adding a construction in header of the home web page. Then it will ask you to enter your existing name and password or create a new account.

Fig. 1. Adding construction   Fig. 2. Register/login window

After registering or login you will be able to add new construction. To finish adding click on "Update entry" button below. The timestamp of your entry and your login email will be added automatically.

3. Editing

In order to edit click on a pencil symbol near the name of the construction. The editing mode will be activated. To edit any field just click on it, you cursor will appear, and then you can start typing. Once again the timestamp of your modification and your email will appear automatically. To finish editing click on "Update entry" button below.
